

PHENIX status

Takao Sakaguchi for the experiment

- Shield Wall closed.
- Pink/Blue/White sheeting done.
 - Thanks to CA-D for quick processing.
- Cosmic ray running for Muon arm trigger system was successful.
 - Already accumulated minimum number of events to evaluate background. Now analyzing.
 - Recording additional events to reduce statistical uncertainty.
- Magnet test in progress.
- Flammable gas flow started this morning.
 - Test of Resistive Plate Chamber in forward region will start in a few days.
- We finished all the work to be done before IR close.
 - Tune-ups of detector systems and DAQ are on-going for the beam.

PHENIX, this morning
